

Take action to improve the safety of your school

School Zone Safety Range

Increase Safety and Save Lives

Recent research shows that up to a thousand children a month are injured in traffic accidents in the UK and up to one in four of these occur when the child is on foot and within 500m of their school gates.

Unipart Dorman's School Zone Safety Range has been specifically designed to improve safety by alerting drivers, which will reduce accidents involving children going to and from school, especially on dark winter mornings.

Warn Drivers and Reduce Risks

Using only the highest grade materials and LED technologies allied to innovative design, Unipart Dorman's School Zone Safety Range actively engages

drivers by making them aware that they are entering a school zone. This allows drivers to modify their driving patterns and reduce the risk of accidents and injury to schoolchildren.

A Complete Safety Solution

Unipart Dorman can provide a complete end-to-end solution to increase safety in school zones and all of our signs are designed to offer simplicity, choice and value for every individual school.

With products ranging from the TSRGD Diagram 4004 compliant amber flashing light pod, to fixed plate signage with either standard and approach lit LED lanterns to LED Vehicle Activated Signs - Unipart Dorman will work closely with you to provide the best solution to suit your school and safeguard children from traffic hazards.

Features and Benefits

- Reduce risks and accidents in school zones
- Increase awareness by alerting drivers to the fact that they are entering a school zone
- High quality UK manufactured products give excellent service life
- Superb product support including dedicated installation and maintenance teams
- All products in the range can be supplied by either AC mains power or solar/wind power
- Unipart Dorman has an excellent record of supporting school road safety initiatives, including traffic volume and speed surveys and engaging with police community school road safety programmes and visits
